Access to the world's best healthcare, when you need it the most

Co-Diagnosis[®] Process

Initial Diagnosis of Serious Illness

If you are diagnosed with a serious illness, such as cancer or heart disease, you will have lots of questions. How will my life change? Is it treatable? How do I tell my family? But there is one question you should never have to ask: do I have a great doctor? With MORE Health our experienced case managers connect you and your treating doctor with one of our exceptional Physician Specialists who work together to make sure that you have the correct diagnosis and optimal treatment plan.

Collect and Organize Medical Records

One of our case managers reaches out to your PCP and your treating doctor and explains the Co-Diagnosis process. Then they collect all your appropriate medical records, including test results and imaging. Based on your medical history the Case Manager selects an expert MORE Health Physician Specialist to work on your case.

Unique Collaborative Diagnosis

Unlike a typical Medical Second Opinion you don't have to worry about finding a specialist and then dealing with potentially conflicting diagnoses. The MORE Health Physician Specialist collaborates directly with your treating doctor using our secure, HIPAA-compliant Physician Collaboration Platform to discuss your medical history. Together they jointly develop the correct diagnosis, together with the optimum treatment plan, in the form of a Final Report.

Peace of Mind

The treating doctor explains the Final Report to you and your PCP, then treatment commences. The Final Report can be accessed via our secure Patient Portal at any time. Follow-up support from MORE Health is available for six months to ensure that the treatment path is working.

Should the treating doctor not wish to take part in the collaboration, then the expert MORE Health Physician Specialist develops the Final Report as an Independent Second Opinion and delivers it directly to you and your PCP.
