

CREATED FOR PATIENTS DESIGNED FOR EMPLOYERS

When employees and families are faced with decisions regarding a serious, life-changing illness, we offer access to the best medical minds in the world, exactly at the moment their expertise is required.

We give employees peace of mind and confidence through our virtual Co-Diagnosis®, a medical second opinion service from leading Physician Specialists, delivered as an employer-provided benefit.

For your business - Providing the right diagnosis and treatment at the right time, can increase productivity and decrease the cost of healthcare to an organization, minimizing unnecessary overtreatment and reducing waste due to the treatment of misdiagnosed conditions.

PATIENT CASE STUDY

Correct diagnosis avoids unnecessary surgery

Jeff had been suffering from shortness of breath, heart palpitations and nausea for several months. He visited a local cardiologist who diagnosed him with coronary artery disease. Jeff's best chance of preventing a heart attack was to have a stent inserted into one of his arteries.

Jeff utilized his Co-Diagnosis® benefit and reached out to MORE Health. Jeff's case was reviewed by a leading cardiologist Dr. Gordon Fung. It was determined that Jeff did not need a stent. He was suffering from stress, not coronary artery disease. Dr. Fung prescribed a month of complete rest.

After a short vacation, Jeff's symptoms disappeared and he returned to work without undergoing an expensive, invasive and completely unnecessary procedure.

The average cost to insert a stent is \$27,907, ranging from \$16,406 to \$61,184.

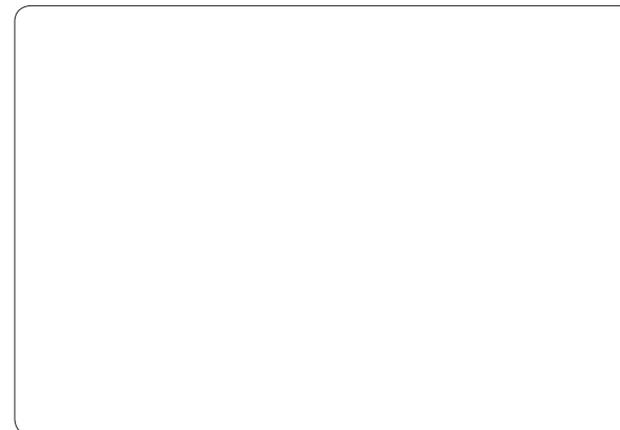

International Federation of Health Plans, "Comparative Price Report" (2013). To protect patient privacy all patient stories use aliases.

COMPANY BENEFITS

- Controlled Medical Costs
- Compliments any existing Health Plan
- Reduce Unnecessary Surgeries
- Attract and Retain Employees
- Reduce Absenteeism
- Boost Productivity

EMPLOYEE BENEFITS

- Access to World Class Physicians
- Quick Turn Around Times
- Independent Diagnosis
- Collaborative Co-Diagnosis
- No Out-of-Pocket Costs
- Reduces Stress

IMPLICATIONS OF MISDIAGNOSIS

Establishing the correct diagnosis is the main driver of good healthcare outcomes.

of medical cases are misdiagnosed

JAMA, "Bringing Diagnosis Into the Quality and Safety Equations," (2012)

of diagnostic mistakes can be life threatening or result in death or permanent disability

JAMA, "Diagnostic Error in Medicine," (2009)

SECOND OPINIONS MATTER

If you are diagnosed with a serious illness, you will have a lot of questions. How will my life change? Is it treatable? How do I tell my family? But there is one question you should never have to ask: Do I have the best possible medical advice?

Of second opinions result in major changes to diagnoses or recommended treatments

Mayo Clinic, "Patient-Initiated Second Opinions," (2017)

Our experienced case managers virtually connect you and your treating doctor with one of our Physician Specialists who work together to make sure you have the correct diagnosis and optimal treatment plan.

OUR CO-DIAGNOSIS® PROCESS

A collaborative approach puts the patient at the center of the process.

- Patient activates Co-Diagnosis
- Case Manager collects medical records
- Physician Specialist selected based on case
- Physician Specialist collaborates with treating doctor to establish Co-Diagnosis
- Physician Specialist can also establish an Independent Second Opinion
- Treating doctor delivers diagnosis and treatment plan
- Follow up support for up to six months

PHYSICIAN SPECIALISTS

Over 99% of our physicians are affiliated with academic medical centers and 95% attended top 20 medical schools as ranked by US News & World Report. All of our Physician Specialists have recent publication history with notable journals, an indicator that a physician is an expert on diagnosis and cutting-edge therapies. And, our Physician Specialists know how to avoid the cost and potential complications of overtreatment and misdiagnosis.

PHYSICIAN COLLABORATION PLATFORM

HIPAA-compliant Physician Collaboration Platform allows doctors to work together from multiple locations in a truly effective manner.

SAFE DIGITAL SOLUTIONS

"We have developed a culture of security, as well as built safeguards directly into all our technology from the ground up. Our design philosophy for security can be summed up with the triad: Confidentiality, Integrity, and Availability."

- Tim Hoffman, Chief Privacy & Security Officer

Confidentiality

We deploy multiple layers of protection to all our patient information.

Integrity

We ensure that all information in our systems are both trustworthy and accurate. We use 256-bit encryption for all patient data, whether it is in transit or in storage.

Availability

We guarantee 24/7 access to our systems.
